T0K3N L@UNCH (Token launch)

A cultural ticker named s1r1us may exist on a public pad such as pump.fun. This repo and s1r1us.ai do not sell it, do not take orders for it, and do not promise profit from the 7-bot's work. It is not shares of the desk, not a claim on bitcoin, and not how the book is funded. Do not buy any ticker because bots or a bitcoin stack exist.

Support (optional)

Donations cover web hosting, s1r1us.ai registration, and operation of the open-source web app, iOS app, and Google Play app. Not an investment.

Publish (GitHub + DigitalOcean)

See [\[DEPLOY.md\]\(DEPLOY.md\)](#). App Platform: Dockerfile, HTTP 8080, 1 GB RAM, autodeploy off. Custom domain s1r1us.ai is attached. Keep GoDaddy nameservers; A records to DigitalOcean ingress IPs.

Node 22. Host: DigitalOcean App Platform. No Google DNS.

```
npm install
```

```
npm run dev
```

Optional env: XAI_API_KEY for Ask Grok. Tape still works without it.

```
npm run typecheck
```

```
npm run build
```

Coinbase for Agents is dry-run in this repo. Never commit CDP JSON, seeds, admin hashes, or Yubi ids.
