OVERALL 8

Practice-run grade: INCONCLUSIVE (pulse paused). Call-quality grade: PASS (MEDIUM ACCUMULATE, RSI 45.6, clip \$10, never sell).

Practice pulse paused=true day=0 fills 0/0. Would-accumulate is listed on the public tape (bots 1-6, 7-BOT AUTO, GM MOD3 AUTO). Live Coinbase stays off.

What the report CAN score: live Coinbase last, RSI, F&G, 7-BOT call, classified host errors, forum/board/security, DEPLOY #68 system test.

What it CANNOT score without an unpaused pulse: fill count, USDC spent, BTC stacked on the operator book.

9. Operator action before green

A. Wire a second quote host (or repair Yahoo crumb) -- Mag7/MSTR backup stays OPEN.

B. Fees n/a this run -- do not green the fee-blind gate.

C. Practice pulse paused -- do not green stacked BTC until the desk posts fills.

D. Do not arm Coinbase create. Auto trade LOCKED. Forum/board tokens are not admin.

I will not green A, B, or C until they actually work. Do not arm live.
